

Environmental Questionnaire for Suppliers of Waste Pick-up

Introduction

The NARMCO Group Environmental Management System (EMS) is designed to meet the requirements of ISO 14001 Standard. The principal elements of the **EMS and environmental policy** are:

1. To establish and operate effective procedures aimed at controlling environmental performance to comply with all relevant environmental compliance obligations.
2. To set objectives and targets aimed at achieving prevention of pollution, protection of the environment, and continual improvement in environmental performance.

P.I.C – Prevent, Improve, Comply

An important part of the EMS relates to the control of Suppliers who pick up waste from our facilities for final disposal (end of life treatment).

The purpose of this questionnaire is to ensure that waste being picked up is disposed of in an appropriate manner.

The Vendor shall prepare and maintain information including a clear statement regarding Waste disposal methods. This method statement shall be completed **every 5 years** for active suppliers.

Vendor Information:

Name:	
Address:	
City:	
Province/State:	
Country:	
Phone Number:	
Facility Site Coordinator:
